Education

Birla Institute of Technology, Mesra

Bachelor of Technology in Electronics and Communication

July 2021 – May 2025

Ranchi, Jharkhand

Experience

Tredplus

February 2026 – Present

Software Engineer

Ahmedabad, Gujarat

- Architected and developed the **Admin Portal** end-to-end, translating **Figma** designs into production-ready features while integrating **REST APIs** and collaborating with cross-functional teams.
- Engineered the **Deal Output Parameter** module and scalable **onboarding APIs** with **RBAC model**, input validation, and sanitization, reducing manual reporting effort by **40%** and onboarding errors by **30%**.
- Built fully **responsive UI** across ultra-mobile to desktop using **Next.js**, **Shadcn UI**, **Tailwind CSS**, and optimized performance with **Zustand** and memoization, reducing unnecessary re-renders by **35%**.
- Resolved **45+ production-critical defects** through systematic debugging, root-cause analysis, and resilient error handling, significantly improving application stability and production reliability.

INNOFarms.AI

May 2025 – October 2025

Software Engineer

Gurugram, Haryana

- Delivered **10+ end-to-end product features** in an **agile** environment across **Next.js** and **Node.js** stack, reducing average feature development cycle by **35%** through modular architecture and reusable service layers.
- Collaborated with the engineering team to containerize application using **Docker** and deploy to **Azure** cloud via **CI/CD pipelines** with **GitHub Actions**, achieving **99.9%** uptime in production.
- Designed **high-performance, scalable RESTful APIs** with structured error handling, input validation, and optimized database queries using **PostgreSQL**, reducing average API response time by **30%**.
- Implemented **JWT-based authentication** and **role-based authorization** across **distributed services**, strengthening application security and reducing unauthorized access incidents by **50%**.

Projects

AI-Powered Coding Platform | **Next.js**, **TypeScript**, **Node.js**, **PostgreSQL**, **Docker**, **OpenRouter AI**

June 2026

- Built a **full-stack AI-powered coding platform** with a browser-based code editor, secure authentication, coding problem management, code submissions, and AI-generated code reviews using **Next.js**, **TypeScript**, **Node.js**, and **Express.js**.
- Engineered scalable **RESTful APIs** using **Prisma ORM**, **PostgreSQL**, and **JWT authentication**, implementing modular service architecture and secure access control.
- Containerized the application with **Docker**, implemented **Redis** caching for improved backend performance, and developed a real-time analytics dashboard tracking submissions, accepted solutions, problems solved, and success rate.
- Integrated **OpenRouter AI** to deliver structured code reviews with time/space complexity analysis, strengths, and improvement recommendations, storing AI feedback alongside submission history.

SyncFlow Automator | **React**, **Next.js**, **Node.js**, **NestJS**, **PostgreSQL**, **Docker**

Jan 2026

- Engineered a **full-stack workflow orchestration platform** using **React**, **Next.js**, **Node.js**, and **NestJS** with **real-time dashboard** visualization, increasing system processing efficiency by **35%** and reducing task monitoring time by **30%**.
- Implemented **JWT-based authentication** across frontend and backend services, enforcing secure session management and improving data protection by **50%**.

Technical Skills

Languages: C++, Java, JavaScript (ES6+), TypeScript

Frameworks & Libraries: React, Next.js, Node.js, Express.js, NestJS, Tailwind CSS, Shadcn UI, Zustand

Databases: PostgreSQL, MySQL, Redis, Supabase, CosmosDB

Cloud & DevOps: Docker, Azure, Vercel, GitHub Actions, CI/CD Pipelines

Developer Tools: Git, GitHub Copilot, Postman, Swagger, Vite, ESLint, Figma, Prisma ORM

Concepts: Data Structures & Algorithms, Low-Level Design, RESTful APIs, MVC, Modular Architecture, Microservices

Relevant Coursework: Object Oriented Programming, Database Management Systems

Achievements

Competitive Programming: Solved **500+** DSA problems, earned **50 Days Badges** in 2025 & 2026.

Certifications: Full Stack Web Development with MERN Stack & GenAI - Udemy (Jan 2026, 90 hours)
